PRETREATER PRO

PRETREATER PRO

Invest in your DTG business success with the right pre-treatment machine!

PreTreater Pro takes the stress out of the pretreating process. Enjoy precision spraying capabilities that will seamlessly prepare your garments for amazing prints.

- ▶ 41x60cm true spray area (4 nozzles)
- ▶ Simple cleaning procedure.
- ▶ Two liquid supported with automatic liquid switch.

7" color touch screen with modern UI

Enjoy intuitive messages and a helpful notification system to avoid user errors.

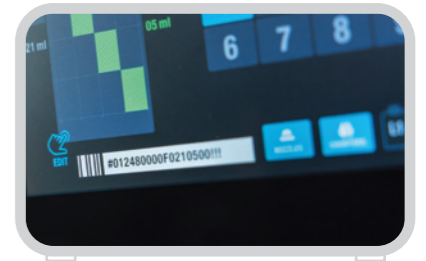

Advanced Job & Liquid Consumption Calculators

Easily keep track of your production.

"Barcode Ready"

Scan to spray automation feature (stores spray area and liquid quantity).

Accurate Liquid Quantity selection per 1 ml

Spray the right liquid amount avoiding costly experiments.

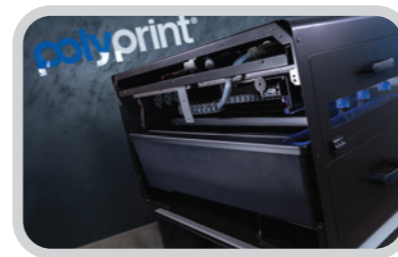

Precise Spray Area selection

"Linear" (min. 10x1cm) & "Grid" (min. 15x10cm) edit modes, to only spray your desired area and save on liquids.

Auto Liquid Re-circulation System

Gain liquid homogeneity, prevent sedimentation and ensure a consistent spraying pattern on every t-shirt.

Distinctive anti-corrosion Isolation Chamber (Box-in-a-Box design)

Minimize rust and prolong your machine's lifespan.

Easy access Tank Storage Compartment

4x5L commercial replaceable tanks (2x pretreat, 1x cleaner, 1x waste), to avoid messy situations during refills and enjoy a clean workspace.
